

**National  
Aeronautical  
Laboratory**

**Documentation Sheet**

**Document Classification**

RESTRICTED

**Title** : LASERS AND THEIR SELECTION  
FOR ANEMOMETRY

**Document No.**

PD-PR- 8710

**Date of issue:** June 1987

**Author(s)** : K.SIVASANKARAM

**Contents**

**Division** : PROPULSION

**No. of copies:**

**External  
participation** :

**NAL Project No.**

PR-1-117

**Sponsor** : AR & DB

**Sponsor's Project No.**

**Approval** : HEAD, PROPULSION DIVISION

**Remarks** :

**Keywords** : LASER ANEMOMETRY, LASER APPLICATIONS

**Abstract** : Fundamental principles of laser operation, properties of laser radiation and types of lasers have been reviewed. Operating principles and constructional details of He-Ne and Argon Ion lasers have been discussed. Single frequency operation using intracavity Etalon is also presented.
